Assignment for Financial Analyst

Your task is to conduct a comprehensive financial analysis of D-Mart, a prominent retail company, with a focus on providing insights into when to buy, hold, or sell the company's stock.

Based on your analysis, provide a clear recommendation on whether investors should buy, hold, or sell D-Mart's stock. Justify your recommendation with solid reasoning supported by the financial analysis conducted.

While Creating report you can analyze the following things:

- Analyze D-Mart's historical stock performance. Identify key trends and factors influencing the stock price movement.
- Evaluate D-Mart's revenue growth over the past few years. Analyze the factors contributing to this growth and assess its sustainability.
- Utilize financial metrics such as return on equity (ROE) and return on assets (ROA) to evaluate D-Mart's ability to generate returns for its shareholders.

Submission Guidelines:

- Prepare a one-page report summarizing your analysis
- Ensure clarity, conciseness, and coherence in your presentation.
- Use relevant financial metrics and data to support your analysis.
- Submit your report using the Google drive link in the assignment submission area.

Note: Please make sure you have provided Drive link view access if you didn't provide means directly you will be rejected.
